1. Excursion tour to Tirga

Context: Field tour serves as an opportunity for exploration, discovery and original experience of animal life.

Aim: To gain the practical knowledge of the aquaculture and vermiculture in the field and aware the villagers to a number of social evils by the students.

Activity: M.Sc. students along with faculty members **Dr. Seema Gupta and Smt. Indu Mandrik** visited a **fish farm at, Tirga, Dist. Durg** on 17/10/2014 to study induced breeding, fish pond & its maintenance, identification of male & female fish and integrated farming, prawn culture and Vermiculture.

They performed Nukkad Natak against “Andh-vishwas” and also delivered lectures on different social issues like Nasha Mukti, Dahej Pratadana, Human Rights amongst the students of Govt. H.S. School of Tirga Village. Students participated in plantation with local school students.

Learning outcome -They learned about fresh water fish culture, Vermi culture, prawn culture and learn how to aware the villagers to various social evils.

Beneficiary- Approximately 46 M.Sc. Students and teaching staff and non-teaching staff

Guest Lectures:

- a. **Dr. A.K Pati** (Professor of Bio-science, Pt. Ravi Shankar Shukla University, Raipur 492 010, India) delivered lecture (11.9.14) on “Academic output –How to Augment and measure”h-index. He stated that the ***h-index*** is an index that attempts to measure both

the productivity and citation impact of the published body of work of a scientist or scholar. The index is based on the set of the scientist's most cited papers and the number of citations that they have received in other publications. The index can also be applied to the productivity and impact of a scholarly journal as well as a group of scientists, such as a department or university or country. The index was suggested in 2005 by Jorge E. Hirsch, a physicist at UCSD, as a tool for determining theoretical physicists' relative quality and is sometimes called the *Hirsch index* or *Hirsch number*.

The index is based on the distribution of citations received by a given researcher's publications. Hirsch writes:

A scientist has index h if h of his/her N_p papers have at least h citations each, and the other $(N_p - h)$ papers have no more than h citations each.

In other words, a scholar with an index of h has published h papers each of which has been cited in other papers at least h times. Thus, the h -index reflects both the number of publications and the number of citations per publication. The index is designed to improve upon simpler measures such as the total number of citations or publications. The index works properly only for comparing scientists working in the same field; citation conventions differ widely among different fields.

The h -index serves as an alternative to more traditional journal impact factor metrics in the evaluation of the impact of the work of a particular researcher. Because only the most highly cited articles contribute to the h -index, its determination is a simpler process. Hirsch has demonstrated that h has high predictive value for whether a scientist has won honors like National Academy membership or the Nobel Prize. The h -index grows as citations accumulate and thus it depends on the "academic age" of a researcher.

b. Dr. V.K. Gupta(24.9.2014) delivered a lecture on Alternative to animal dissection

Excursion Tour: Visit to Wildlife Sanctuary, Barnavapara,

Context: Study tours are important in many ways. It provides valuable educational opportunities away from the classroom, without using textbooks and other tools used in a normal course. Students will have a greater knowledge of how presently wildlife conservation and management relates to the economy and environment as well as in future.

Aim: Observed local animal and plant life in their natural habitat and learned to identify common wildlife species

Activity: M.Sc. students visited a Wildlife Sanctuary, Barnavapara, Dist. Mahasamund with teaching faculty Dr. Seema Gupta, Dr. Renu Maheshwari and Dr. Kavita Das and non-teaching staff on 05.04.2016. This sanctuary was established in 1976 under Wildlife Protection Act of 1972. The area of sanctuary is 245 sq km and is well known for its fauna and flora. This sanctuary is mainly comprised of Bamboo, Sal, Terminalia, Teak and many other varieties of trees. The rich flora supports a wide variety of wildlife. During the visit students got opportunity to interact with Ranger of Barnawapara Mr. Manoj Chandrakar and discussed about rules and regulation of forest. He explained how to identify the animals and how one should behave in the Jungle. In addition he also discussed about wildlife conservation. During the visit we got opportunity to see Monkey, Bison, Neelgay (Male & Female), Deer, Bear and variety of birds like Peacock, Red vented Bulbul, Crow, Dove, Neelkanth, Sparrow etc.

. Guest lectures

a. . Dr. H.K Wardia delivered a lecture on **fish culture** in Chhattisgarh

Context: Fish production in the Chhattisgarh had registered a growth of more than 130 per cent over a period of a decade. With the increase in the production, Chhattisgarh had now placed in top six fish producing states in the country. "The state government encouraged the fish farming by giving numerous incentives to the fishermen and it had brought the required change..

Aim: There are numerous job opportunities in government and the private sector. Candidates can go for entrepreneurship or self-employed in their own fisheries-related business

Learning outcome: Fisheries in India is a very important economic activity and a flourishing sector with varied resources and potentials. Students learned about fish culture

Beneficiary: M.Sc. Students

b. . A lecture for NET Examination preparations was organized on 9.4.16 by Mr. Bhupendra Sahu

2016-2017

Guest Lectures

S.No	Date	Lecture Given By	Topic	To Class
1.	4.10.16	Dr. A. K. Pati	Biological clock and Rhythm	M.Sc. students
2.	6.10.16	Dr. Meetu Gupta	Wild life animal and Wild life crime	
3.	7.11.16	Mr. Ramit Singal	Bird watching and documentation	
4.	22.3.17	Dr. V. N. Mishra	Soil and water testing and its concepts	

2017-2018

Guest lecturers:

a. Lecture of Dr. K.N. Bapat (Principal, Govt.N.P.G. College of Science,Raipur) on 28.7.17

Context: Leaving home and traveling to a new country can be a stressful experience, even though it may be something to have planned and prepared for. Many people are surprised when they experience the impact of culture shock, and it can be helpful to realize your

experience is actually quite normal. It includes the shock of a new environment, meeting lots of new people and learning the ways of a new country.

Aim: An overseas trip is an amazing opportunity for students to practice their language skills, especially the communicative skills of understanding and speaking and are more often than not the skills that students are generally most nervous about for end of exams. A trip to abroad gives them unique opportunity to get extensive practice.

Dr. K.N. Bapat shared his experiences about his trip to abroad

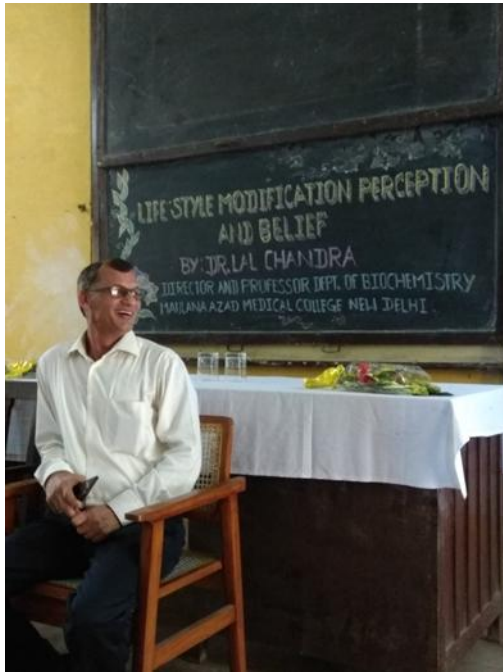

Outcome: Students got awareness on – language learning Opportunities, their culture, interaction with new friends having new ideas intended to motivation.

b. Dr. Lal Chandra delivered a lecture (Director and Professor, Deptt of Biochemistry, Maulana Azad Medical College, New Delhi) on 27.7.17. His talk was based on “Life style modification perception and belief”.

Context: The positive effects of lifestyle intervention programmes might be enhanced when targeted to the health-related behavior of the users. The beliefs and attitudes regarding a healthy life style, influence on lifestyle behavioral change and the needs to support a healthy lifestyle in the local community.

Aim: Promoting healthy lifestyles

Outcome: Life-style modification based on behavior therapy is the most important and effective strategy to manage the healthy life.
